

From development to use animal medicines have a *built-in One Health approach* when it comes to safety.

The approval process includes assessments for:

The EU regulatory process for licensing animal medicines is designed to assess:

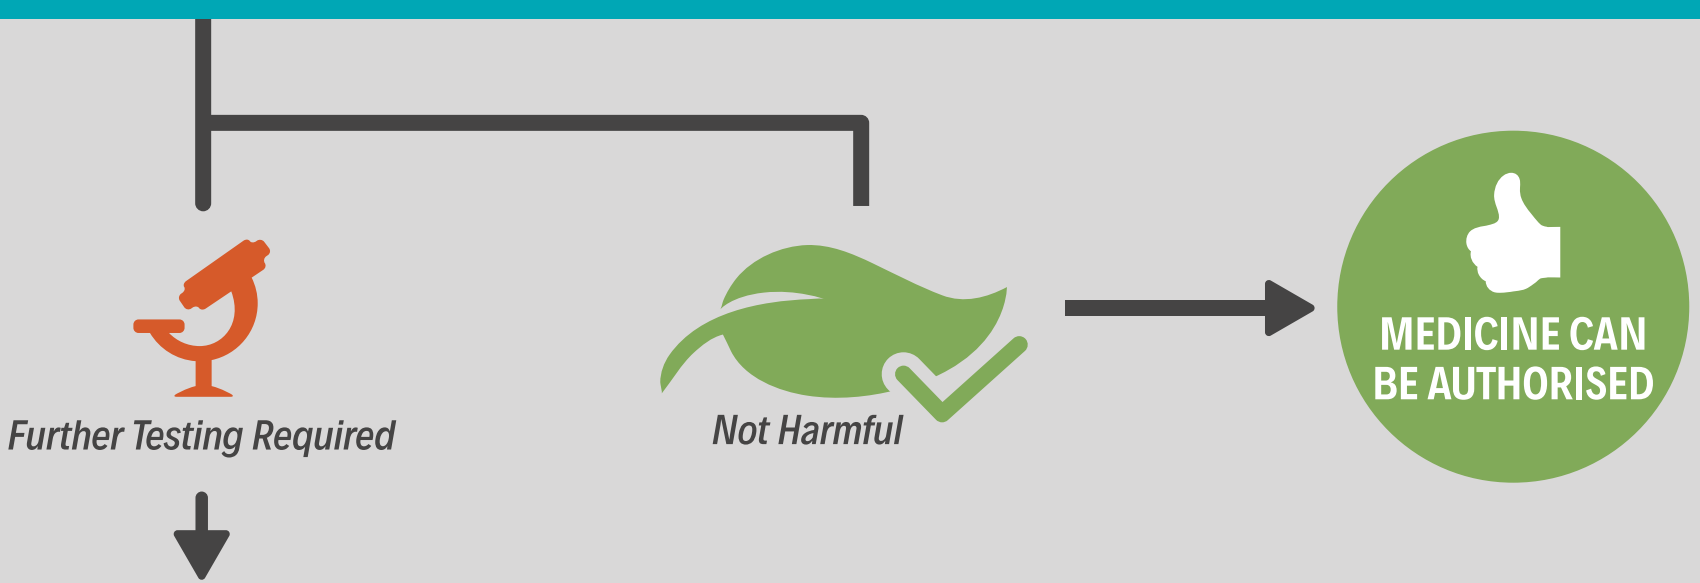

**Safety**

**Efficacy**

**Quality**

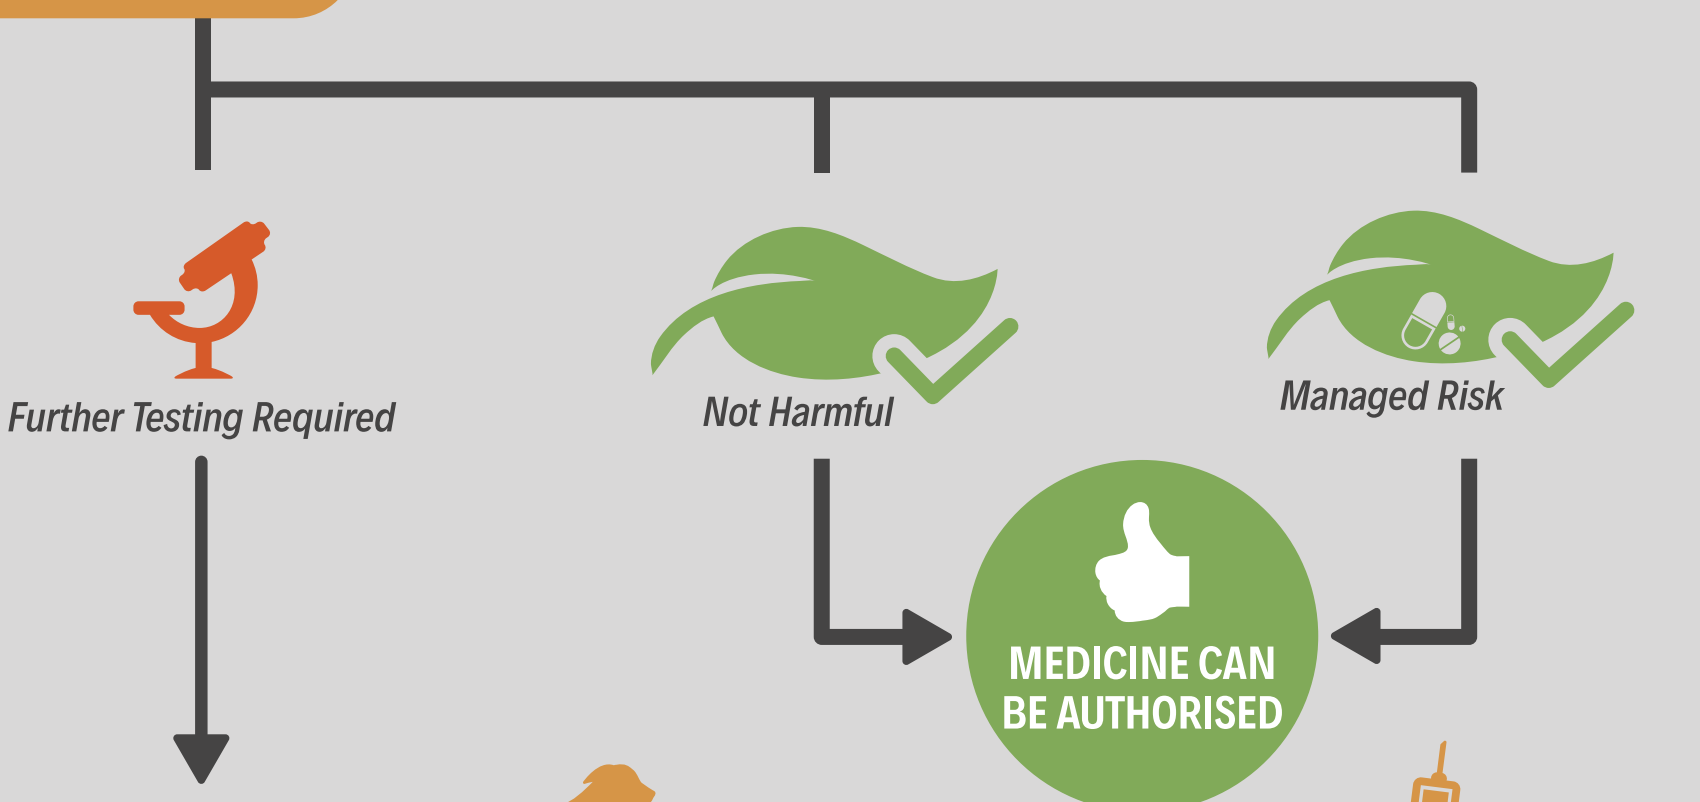

# ENVIRONMENTAL RISK ASSESSMENT OF ANIMAL MEDICINES

## PHASE 1: Identification of animal medicines that may have an impact on the environment

## PHASE 2: Evaluation of medicines requiring an extensive risk assessment Performed in two parts (Tiers A and B)

### Tier A

### Tier B

IF BENEFIT-RISK ASSESSMENT IS **NEGATIVE** AUTHORISATION CAN BE **DENIED**

Healthy animals mean healthy people and a healthier planet
